

BRAND INTRODUCTION

Zhejiang **YALONNUS** Technology Co., Ltd. was established in 2005. The company covers an area of over 70000 square meters and has more than 500 employees. It integrates design, research and development, production, sales, and service, specializing in the production of high-end private customized steel windows, Class A splicing safety doors, villa doors, passive doors, etc. under the "YALONNUS Brand".

The company's quality management system meets and has passed the certification requirements of ISO90012001, and has been awarded honors such as National High tech Enterprise. Since its establishment, the company has achieved a closed-loop ecosystem of all product categories, including steel windows, entrance doors, courtyard doors, garage doors, etc. In the future, **YALONNUS** will continue to create high-end home doors.

70 STEEL WINDOW SYSTEM

- The world's largest manufacturer of special cold-rolled steel pipes
- Leading cold processing technology for steel profiles in Europe
- A leading developer and provider of fire protection systems in Europe
- High quality steel profile frame system
- Thermal insulation dual cavity design, blocking indoor and outdoor heat exchange
- Can be paired with various glass pressure lines
- Galvanized profiles with superior anti-corrosion quality

STEEL DOOR SYSTEM

- European standard precision steel profiles
- Century old steel window system
- Durable materials and minimalist profiles
- Hollow glass can reach a maximum thickness of 37mm
- Can be paired with various glass pressure lines
- Galvanized profiles with superior anti-corrosion quality
- Class C fire rating
